**SEED CORN
SPECIALISTS**

CARL A. HANSEN NURSERY

ESTABLISHED 1922

**HARDY PLANTS FOR THE NORTHWEST
BROOKINGS, SOUTH DAKOTA**

CARL A. HANSEN, SOLE OWNER

CARL ANDREAS HANSEN

DEAR FRIENDS:

I take a great deal of pleasure in presenting you with this, my annual catalog. For the past year has been a good one and I had the pleasure of meeting, getting acquainted with, and serving a great many more friends than ever before.

This year with much added equipment, land, larger scale production, and the erection of more buildings, and a good sized increase in our efficient force of helpers, I feel that we can serve you more promptly, with better stock, and at lower prices than ever before.

Altho I sell everything in the line of hardy plants and seeds for the northwest, my specialty is my father's improved plant and seed introductions. I do this for two reasons, first, because I know from widespread reports and recommendations that they are the best for the northwest; and secondly because of the pride and joy I get in so doing.

Naturally, because of our relationship, my father is a great inspiration to me, but without regard to any sentimental issue I believe I am only voicing the belief of thousands, when I say that Prof. N. E. Hansen is the greatest plant breeder of all time, and one who has done more for the general improvement of plant crops in the northwest than anyone else has ever done. He has introduced more improved plants that have been of more practical help to the people of the northwest than anyone else. His plant creations have increased the land values in the northwest by millions of dollars. The results of his efforts have many times rewarded many by big increasing yields, better crops, and wealth.

He is known from coast to coast, and around the world. His name is a household word in many localities, where were it not for some of his improved plants, human existence would be practically impossible. But a few have not heard of some of his plant wonders, yet many do not know of the immense number of varieties of his introductions in all kinds of plants and even animals. Bulletin 224 of South Dakota State College gives a quite complete description of them up to the past few years. If you are interested in knowing more about them it will be well to write to Dr. N. E. Hansen at South Dakota State College, Brookings, and ask for a copy of this plant bulletin, No. 224.

The Nation and also the State of South Dakota are indeed fortunate that they have had the co-operation of such a great genius, to work out these plant improvements which are of such great benefit to all. In a measure some of this great work has just been begun, for it takes years of painstaking care, endeavor, and thought to perfect each new creation. It is hoped that in every way, everyone throughout the state will help in this great work, by co-operating with Dr. N. E. Hansen in the bigger and better continuance of his work while there is yet time.

By this I mean that great men do not live forever and so to take advantage of the great increased benefits, every aid and possible help should be given Prof. N. E. Hansen to speed to a finish many of the greatest improved plant creations he has on the way to completion. His great accomplishments are already well known, but his dreams and plans for greater new and bigger accomplishments in improved plants are still greater and more numerous. It is up to us to help in this great work all we can.

Carl A. Hansen

TERMS

PAYMENT: May be made either in full in advance or else 25% down and the balance C. O. D., and may be made in any convenient form,— however, check, money order, or bank drafts are the safest ways.

DELIVERY: All nursery stock and seeds and seed corn, except alfalfa seed and seed grains, are quoted F.O.B. Brookings, South Dakota. The Alfalfa seed and seed grains are quoted F. O. B. our western South Dakota seed house. All transportation charges are paid for by the customer.

SHIPMENT: By Express, Freight, or Parcel Post. We will make shipment the best and cheapest way. The largest and heaviest orders are sent by freight. Orders from about 20 to 30 lbs. go by express. Orders for less than 20 lbs. go best by Parcel Post, providing the package is not over the size limits about 4 feet high. Parcel Post Shipments we send C. O. D. for the postage unless sufficient postage is sent with the order to prepay it. On Parcel Post shipments that we send C. O. D. for the postage there is an extra charge of ours and the Post Office Department for handling and collection fees, which makes the amount higher than on the prepaid shipments. 20c to 30c will mail most of the smaller and medium sized orders; 30c to 50c will carry most of the larger orders which are able to go by this method, and for not too far distances. Be sure to send enough and if you send too much we will include more than enough extra material to make up the difference.

RED SILVER CRAB—A Beautiful Lawn Tree

The First Carl A. Hansen Plant Introduction

It is a rich maroon red from top to bottom, in bark, in branch, and in leaf. The somewhat cut-leaf foliage has in addition a silvery touch underneath, making a remarkable combination throught the season. Only a very few plants available this year. **Price: While They Last, \$5.00 Ea.**

Latham Raspberries

Sunbeam Raspberry

The most popular and most famous of Prof. N. E. Hansen's red-raspberry introductions. The fruits are flaming red in color, of large size, excellent flavor and wonderful keeping quality. It is perfectly hardy everywhere in the northwest, bearing heavy annually, and over a long period of time each season so is thus called everbearing by some. Because of its fine flavor, good keeping, and productiveness it makes a splendid berry for the market as well as for home use. Prices: Each, 10c; 10 Plants, 75c; 25 Plants, \$1.25; 100 Plants, \$3.50.

OHTA RASPBERRY

The second most popular of Professor N. E. Hansen's red-raspberry introductions. It is of good color, hardy and prolific. Tho not quite as good a berry as Sunbeam it does somewhat better in more rigorous climatic and soil conditions. Prices: Each, 15c; 10 Plants, \$1.00; 25 Plants, \$1.75; 100 Plants, \$4.50.

LATHAM RASPBERRY

Generally considered the best market berry because of its enormous size and good color, its fine flavor and extra heavy bearing. But because of its pedigree and susceptibility to Mosaic it is not as hardy and disease-resistant as Sunbeam or Ohta. Prices: Each, 20c; 10 Plants, \$1.50; 25 Plants, \$2.00; 100 Plants, \$5.00.

STRAWBERRIES

PROGRESSIVE EVERBEARING—The very best of the everbearing varieties. A good producer of fine large berries of excellent quality from early spring till late fall. Prices: 25 Plants, \$1.00; 100 Plants, \$3.50; 500 Plants, \$10.00; 1,000 Plants, \$15.00.

SENATOR DUNLAP—No doubt the very largest and best of the June bearing varieties. Prices: 25 Plants, 75c; 100 Plants, \$2.00; 500 Plants, \$7.50; 1,000 Plants, \$10.00.

RHUBARB

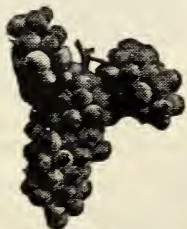

VICTORIA—The sweetest and best of them all. A vigorous grower of rich red stems of extra fine quality. Prices: 15c Each; 10 Large Roots, \$1.15; 25, \$2.50.

ASPARAGUS

The earliest and best green of the garden. Contains those proper vitamins one needs to remain in good health. Fine, large succulent stalks can be cut from early spring till late fall if the bed is properly mulched and cared for. Prices: 2 Year Heavy, Large Roots, 25 For 75c; 50 For \$1.35; 100 For \$2.50; 500 For \$7.50; 1,000 For \$12.50.

HORSE RADISH

NON-SUCKERING—A fine flavored variety which is not too strong and bitey, and will not sucker all over the garden like the common sorts. Prices: Each, 20c; 10 Large Roots, \$1.50; 25, \$2.75.

Hansen Grapes

The New Hansen Grapes

Hardy—Large—Productive—Fine

Several years ago Prof. N. E. Hansen of The South Dakota State College at Brookings, again startled the world by introducing a remarkable collection of 35 new grapes which had the hardness of the wild grape, and were in flavor comparable to the Concord and the best cultivated grapes of Europe. There is no doubt at all but that many of these grapes will attain world fame and be propagated by the millions, as many of his other introductions have been. However, due to the past several years of dry weather and bad growing seasons, the propagation of these remarkable wonders has been extremely slow. Now propagation of them in vast numbers is under way and in a few years we hope to be able to offer them in quantity, altho just now we can't. We have, however, a few choice plants to offer to the lucky ones who will order early. So while our very limited supply lasts we offer to you a few of the choice varieties of our selection at the following prices: Large, Well Rooted Plants, \$2.00 Each; 3 For \$5.00; 6 For \$8.50; 12 For \$15.00.

BETA GRAPE—The best known and hardiest of the popular grapes. Producing amazingly large crops of fine large fruit which are good eating and make excellent preserves, splendid jelly and tasty grape juice. Prices: 20c Each; 3 Vines, 85c; 10 Vines, \$1.50; 25 Vines, \$3.00; 100 Vines, \$10.00.

Sunbeam Raspberries

Carrie Gooseberry

CARRIE GOOSEBERRY

The Leading Gooseberry for the Northwest.

A popular variety of real worth. One of the hardiest, healthiest, and most productive gooseberries grown. The plant is a very vigorous grower, which helps it to carry its large crops of fruit without injury to the plants. The stems are nearly thornless which is an advantage when it comes to picking the fruit. The berries grow to a fine large size, are light red in color and have a pleasing flavor. Every home gardener or commercial fruit grower should be sure to have ample stock of Carrie Gooseberry. Prices: For Strong 2 Year Plants: Each, 25c; 10, \$2.00; 25, \$3.50.

ELDORADO BLACKBERRY—Are the hardiest, biggest, and best of all blackberries and enormous yielders. Prices: Each, 20c; 15 For \$1.00; 25 For \$2.00.

LUCRETIA DEWBERRY—Plant is similar to a blackberry but trails on the ground. Hardest of the dewberries. Fruit very sweet and gets to be over two inches long. Prices: Each, 15c; 10 For 90c; 25 For \$1.75.

Hansen Black Currant

PERFECTION CURRANT

A very good general purpose currant. The fruit has a very fine sweet flavor, is of good size, few seeds, and is born in large clusters of bright red fruits, and bears prolifically. The bush is upright in habit, vigorous and quite hardy throughout the northwest. Prices: Each, 35c; 10 For \$2.50; 25 For \$4.00.

Perfection Currant

HANSEN IMPROVED SIBERIAN BLACK CURRANT

The best currant for the Northwest. Hardy everywhere. Very vigorous. Fruits of enormous size, black-red inside and out, and of a particular sweet mellow desirable taste. Excellent for cooking or eating, and makes wonderfully colored dark rich red jam, jelly, or sauce of superb flavor and beauty. Black Currant preserves are considered by many of the Royalty of Europe to be one of the perfections of preserves in flavor and quality. Heretofore they

have been more or less unobtainable here, due to the fact that the Black Currants of Europe are not hardy here. But now Prof. N. E. Hansen has improved and perfected the Siberian Black Currants till they are equal in quality and flavor to the European Black Currants and are hardy everywhere in the Northwest. Prices For Large, Strong Stalky Plants: Each, 25c; 5 For \$1.00; 10 For \$1.75; 25 For \$2.50.

CHOICE PLUMS OF HIGH QUALITY

SANSOTO PLUM—Sweet and Fine. Similar to Opata but later in the season, thus prolonging your fresh plum season.

CHERESOTO PLUM—Has a very good flavor and bears very early in life. Ripens in mid-season of the plum year.

KAHINTA PLUM—A good deal like Waneta but not as large nor as heavy bearing, tho a more consistent bearer.

KAGA PLUM—Of the Hanska type and somewhat better producer but of not quite as good a flavor as Hanska.

TOKA PLUM—A large and remarkably firm fruit of rich fragrance and excellent quality, which makes it a good plum for the market.

TOKATA PLUM—Delicious in flavor and fragrance. Considered by many the very best in quality of all the Hansen Hybrid plums. Fruit is large with a rich orange-red skin and flesh and a perfect freestone.

PRICES ON ABOVE PLUM TREES

4 to 6 feet.....	75c Each;	3 For \$2.00;	12 For \$7.50
3 to 5 feet.....	60c Each;	3 For \$1.65;	12 For \$6.90
2 to 4 feet.....	40c Each;	3 For \$1.10;	12 For \$4.00

Tokata Plum

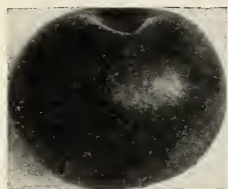

BARGAIN ASSORTMENT OF FRUIT TREES

Mixed plum and apple orchards unquestionably bear the largest and best crops as the inter-pollination of the blossoms gives a perfect stand of fruit and the environment increases the quality and yield. To aid you in getting the best assortment of fruit trees possible, we make the following offers:

6 Assorted Plums for the Home Orchard.....	Large \$3.25; Medium \$2.50; Small \$1.75
12 Assorted Plums for the Home Orchard.....	Large \$6.00; Medium \$4.50; Small \$3.00
12 Assorted Plums, Apples and Crabs.....	Large \$5.00; Medium \$4.00; Small \$2.75
25 Assorted Plums, Apples and Crabs.....	Large \$7.50; Medium \$6.00; Small \$4.00

Oka Cherry

One of Prof. N. E. Hansen's Best Introductions

Oka Cherry

The fruit has the sweetest, almost unbelievably delicious taste. One taste of the wonderful fruit has made many say that Oka Cherry is positively the best and sweetest flavored plum-cherry fruit that was ever introduced. The fruit itself is beautiful to look at, too, being a very dark purplish red from skin to pit. The fruits are firm and will hang to the tree and dry like a prune if you can leave them there that long. The plant is dwarf and bushy, bearing the year after planting, and is perfectly hardy throughout the northwest. Oka has been introduced but a few years so consequently we have but a very limited supply, which from past experience will go very early in the season.

One Year Trees.....	\$1.25 Each; 3 For \$3.50
Two Year Trees.....	\$1.75 Each; 3 For \$5.00
Three Year Trees—Ready To Bear This Year.....	\$2.50 Each

TOM THUMB CHERRY: Somewhat similar to Oka but more for the far north. Prices: \$1.50 Each.

Opata Plum

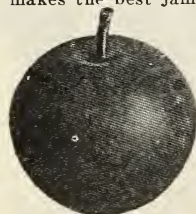

chard to insure having a large crop of fine plums thruout the season.

OPATA PLUM—Earliest plum of all and foremost everywhere for its wonderfully rich and delicious flavor. Bears the year after planting and annually thereafter.

SAPA PLUM—Early, large, productive, and very hardy. Fruit is very sweet to eat fresh, with flesh of an intense purplish red color which makes it wonderful for preserves and jam.

WANETA PLUM—The biggest of the Hansen Hybrid Plums and a giant of all hardy plums. Gets to be over two inches in diameter. Richly flavored, flesh with a highly colored red skin. An enormous yielder.

HANSKA PLUM—Has a superb apricot flavor and fragrance. Many claim makes the best jam of any plum. Has a bright colored orange red skin and yellow flesh.

Hanska Plum

SELECTED POLLENIZER PLUMS—No plum orchard is complete without them and you can expect no great crop unless you have some of these planted among the rest of your plum trees. They will make a big crop bigger, and a fine crop finer. Every plant or animal needs good sires if they are to get the right start in life and unless you furnish the proper sires for your plums you will not get the best setting of fruit. These plums have been selected because of their abundant production of good pollen which will aid the setting of fruit, and because they are productive, hardy, and have fruit of good size and flavor.

Waneta Plum

SPECIAL NEW REDUCED PRICES ON OPATA, SAPA, WANETA AND HANSKA

Large Size—4 to 6 Ft. Each.....	65c; 3 For \$1.75; 12 For \$6.50; 25 For \$11.50

Sapa Plum

Hansen Pear

Yellow Sweet

Amur Crab

Hansen Hardy Pears

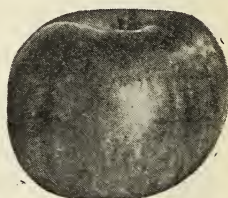

Hardy — Productive — Blight-Proof Good

These pears were introduced from Siberia by Prof. N. E. Hansen and improved by him. They are perfectly hardy anywhere in the Northwest, free from disease and resistant to fire blight, the dreaded disease of the standard varieties. Fruit is of good size and sweet eating, cooks up well and preserves nicely. Trees grow rapidly and are very sturdy. Pear production has just commenced in the northwest and it is an honor to be among the first to start their culture in each community. As our stock of these is quite limited it would be well to order early and avoid disappointment.

3-4 Ft. Trees: Each 75c; 3 For \$2.00; 12 For \$6.50; 25 For \$10.00.

4-5 Ft. Trees: Each \$1.25; 3 For \$3.50; 12 For \$10.00; 25 For \$17.50.

The Best Apples And Crabs

Goldo Apple

GOLDO APPLE—A true winter apple for the northwest with the flavor of Grimes Golden and the hardness of Duchess.

YELLOW SWEET APPLE—An excellent early summer eating apple. Productive and hardy everywhere.

DOLGO CRAB—Fruit is conical in shape, of good size, brilliant red in color, and with a delicious juicy, sprightly sweet flavor. Bears very young, and is hardy far north into Canada.

AMUR CRAB—A most productive fruit. Hardy and free from blight. Fruit of fair size, cooks up well and makes a brilliant red jelly of excellent flavor. Extra fine for pickles.

Prices For Goldo, Yellow Sweet, Dolgo and Amur:

Large Size: Each.....	75c; 3 Trees \$2.00; 12 Trees \$3.50
Small Size: Each.....	50c; 3 Trees \$1.25; 12 Trees \$4.00

WEALTHY APPLE—A long time favorite with all good fruit men. A good eating and cooking, early fall and winter apple.

DUCHESS APPLE—The standard summer cooking apple for the northwest. Bears heavily and annually. Hardy everywhere and very disease resistant.

WHITNEY CRAB—Perhaps the most popular eating crab grown. A good annual producer and hardy. Should be in every fruit orchard.

Wealthy Apple

Prices For Wealthy, Duchess and Whitney.

Large—4 to 6 Ft.....	Each 50c; 3 For \$1.35; 12 For \$5.00; 25 For \$9.50
Medium—3 to 5 Ft.....	Each 40c; 3 For 1.10; 12 For 4.00; 25 For 7.50
Small—2 to 4 Ft.....	Each 30c; 3 For .85; 12 For 3.00; 25 For 5.00

We List Other Varieties Of Hansen Apples And Crabs And If You Wish Any Send For Our Last Years Catalog For Full Description And Prices.

SPECIAL COLLECTION OF APPLES AND CRABS

What was said of plums bearing in mixed plum orchards is equally true of apples and crabs bearing best in mixed apple and crab orchards. The assortment collection will consist of choice varieties of apples and crabs, our selection, altho preference may be given which will be followed in so far as possible.

6 Assorted Apple and Crab Trees, Large—	\$2.50; Medium \$2.00; Small \$1.50
12 Assorted Apple and Crab Trees, Large—	4.50; Medium 3.50; Small 2.50
25 Assorted Apple and Crab Trees, Large—	8.50; Medium 6.50; Small 4.25

ANOKA—The Wonder Apple

One of Prof. N. E. Hansen's Greatest Introductions

BEARS AT TWO YEARS

HARDY — PRODUCTIVE — GOOD

The Best Of Thousands

Three Year Anoka Tree Bearing A Good Crop Of Fruit.

No other apple is like Anoka, none can combine the early bearing wonderful flavor, and great productiveness of this Wonder Apple. It was originated by Prof. N. E. Hansen, the plant genius at the South Dakota State College, at Brookings. It is the result of years of hard work and painstaking care in the difficult art of proper plant hybridization. It is the "find" of thousands of apple and crab crosses, which Prof. N. E. Hansen produces in his work of originating hardier and better apples. Anoka was selected by him from among a great many thousands of his crosses, as the one apple which combined all the best points in hardiness, early bearing, and productiveness, of all his apple and crab introductions.

Bears Earliest Of All

Anoka has the most remarkable ability which practically no other apple has in that it will bear on one year wood and annually, thereafter, the second year after planting. Four year trees have been known to have borne three crops of fruit.

Fine Eating

The size, color, and flavor of Anoka make it a popular favorite. The fruit is good sized, red striped, and comes on early in the season. It is good eating, cooks up well and keeps better than most summer apples.

Very Productive

Anoka is surprisingly productive, often loading its branches till they bend nearly to the ground, yet due to its sturdy habit, seldom breaks under the great weight.

Tree Dwarf

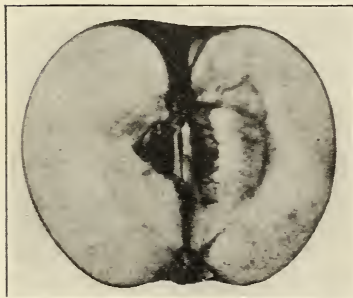

Another remarkable characteristic of Anoka is its dwarf stature, which adapts it nicely to the back yard, and will allow closer planting of the trees in an orchard.

Very Sturdy — Hardy Everywhere

The sturdy growth of Anoka is one of its outstanding characteristics, and is hardy and disease resistant thruout the northwest.

Prof. N. E. Hansen, The Plant Wizard, And A Mature Anoka Apple Tree.

An Inside View Of Anoka, About One-third Natural Size.

PLANT THE ANOKA APPLE

The Wonder Of The Age—Because:—

- 1—Anoka bears the second year after planting.
- 2—Anoka bears large crops of apples every year.
- 3—Anoka is an excellent early summer eating apple.
- 4—Anoka may be planted closer than other apples.
- 5—Anoka is hardy and disease resistant.

PRICES ON LARGE SIZE ANOKA APPLE TREES

Grown On Pyrus Baccata or Siberian Crab, The Hardest Root Stock Known.

One Tree—\$1.00; 3 Trees \$2.50; 12 Trees \$10.00; 25 Trees \$17.50.

Extra Special Offer

Large 3 yr. Anoka Trees, Ready To Bear This Year; \$1.75 Each; 3 Trees \$5.00.

SPECIAL!

We have a few small size trees of Anoka Apple to offer at the following prices while they last.
Prices Per Tree 50c; Six Trees, \$2.50.

ANOKA—A MASTERPIECE OF FRUIT BREEDING!
BE SURE TO INCLUDE IT IN YOUR ORDER FOR FRUIT TREES

HANSEN IMPROVED BUSH CHERRIES

Easy to Grow—Sure to Produce

Good Flavor—Highly Productive—Hardy Everywhere—Disease Resistant

The Development Of Years

Hansen Improved Bush Cherries are the result of over thirty years of untiring selection work by the great plant wizard, Prof. N. E. Hansen at South Dakota State College, Brookings. He has developed what was formerly the rather small, little known, western South Dakota Sand Cherry, into a fruit of large size, desirable taste, good habits, wonderful bearing, and beautiful in flower, fruit and foliage.

DR. N. E. HANSEN
Who has been improving these
bush cherries for over
30 years.

Fruit Of Good Quality

The fruit is good to eat from the bush, is fine in sauce and makes a wonderful jam of the most superb flavor and rich color imaginable. The juice makes splendid jelly and a tasty and not to be forgotten cordial which rarely keeps long.

Grows Bush-Like

Though the fruit of this cherry much resembles a plum in size and shape, the plant itself grows in a bush form, branching and bearing from the ground up. Usually bears the year after planting. It always retains its dwarf stature which is of fine value for planting in the garden, as it doesn't take up near the room of an ordinary plum tree and yet often bears more. The bushes should be planted 2 to 4 feet apart, in rows 4 to 6 feet apart, 25 or more to every home garden.

Beautiful In Plantings

In landscape planting a few of the bush cherries are very desirable as they are dwarf and bushy, and a great aid in foundation covering. While the foliage itself, a beautiful silvery green, turning to a rich red and gold in fall, adds a very desirable color touch to landscape plantings. The profuse masses of white flowers in early spring, completely covering the bushes are a glorious sight. The fruit later is ornamental as well as useful.

Masses of Fruit

Makes A Good Low Hedge

Because of their dwarf bushy habit these Hansen Improved Bush Cherries make a splendid ornamental low hedge for the front lawn, as well as in the garden.

Hardy Everywhere—Disease Resistant

The hardiness of these cherries is unquestioned. They have been used as the sires in a number of Prof. Hansen's introductions, because he knew it would give the new varieties the hardiness they need to withstand the cold and adverse weather conditions we often get. Their sturdiness and resistance to disease is another outstanding characteristic.

Prof. N. E. Hansen Selecting Bush
Cherries

Plant These Hansen Improved Bush Cherries Because:

- 1—They are easy to grow and perfectly hardy everywhere.
- 2—Are good to eat, and make delicious preserves.
- 3—Bear early, heavy, and annually.
- 4—Are dwarf growing and bushy.
- 5—Are excellent for hedges or ornamental shrubs.

A Desirable Good Fruit and Ornamental For Extensive Planting Everywhere—Will Be Planted By The Millions Thruout The World!

Prof. N. E. Hansen and A May Day Tree

MAY DAY

THE BEAUTIFUL FLOWERING LAWN TREE

For superb flowering beauty on the lawn or boulevard none excels May Day. Its long fine white flowers early in spring create a massive bouquet of loveliness that is alluringly wonderful and altogether lovely.

It is the first tree to show green in spring and is practically in full leaf long before many of the common trees begin to leaf.

The flowers are a wonderment in themselves, blooming early in spring, in April or early May, and always several weeks earlier than any of the other flowering trees. The flowers are large, pure white and very fragrant. Their mass like clusters are a beautiful sight and are well adapted to cutting for the house or early spring lawn festivals.

The fruit of the trees are small and though edible and make good jelly are soon claimed by the birds in preference to what we consider better fruit. Thus, our good fruit is saved, yet the birds are fed.

May Day may be trimmed up for a street or lawn shade tree or left in bush form as shown. It grows rapidly. It is perfectly hardy far north into Canada as it came from the colder parts of Siberia.

Specimen Trees—

3 to 5 Ft. \$3.75 Each; 5 For \$3.25; 10 For \$6.00

Specimen Trees—

4 to 6 Ft. 1.00 Each; 5 For 4.50; 10 For 7.50

Specimen Trees—

5 to 7 Ft. 1.25 Each; 5 For 5.50; 10 For 9.50

SPECIAL! Extra Large Especially Selected Specimen Trees 7 to 10 Ft. \$2.00 Each.

CHINESE ELM

This remarkable elm for street and lawn is fast becoming the leading Elm thruout America. It grows faster, is more drouth resistant, longer lived, grows larger, and is harder than any other shade or street tree grown. It is much finer than the ordinary Elm. The foliage is finer and feathery, a brighter green, and more dense, and the branches make almost right angles with the trunk instead of being sprangly like the common Elm. This tree is sweeping the country like wild fire, the demand is increasing faster than the supply, and it is only by rare good fortune that we are able to offer any at all to you this year. But our supply is limited so order early.

3 to 5 Ft. Trees: Each 50c; 5 Trees \$2.25; 10 Trees \$4.00; 25 Trees \$8.50. 4 to 6 Ft. Trees: Each 75c; 5 Trees \$3.50; 10 Trees \$6.50.

HOPA RED FLOWERING CRAB—Prof. N. E. Hansen's red flowered, and red fruited, hardy flowering crab. Price: 3-5 Ft. Trees \$1.50 Each.

CISTENA PURPLE LEAF SANDCHERRY—A beautiful, hardy, purplish red leafed flowering shrub, of unique beauty. Price: 3-5 Ft. Trees \$1.50 Each.

GINNALA MAPLE—A semi-dwarf, cut-leafed ornamental maple. Brilliantly vari colored foliage in fall. Introduced from Siberia so is perfectly hardy all over. Prices: 2-4 Ft. Very Sturdy And Bushy Trees—75c Each; 3 For \$2.00; 5 For \$3.00.

NEW ULM BLACK WALNUT—A hardy, large size, Black Walnut from New Ulm, Minnesota, and the hardest Black Walnut yet introduced. It has been said that much of our future foods will be from nuts as more food value can be raised to the acre with nuts than any other crop. It will be well to get the right start now in a coming new big industry, with the hardest varieties available of a choice food. Prices: Each 50c; 5 For \$2.00; 10 For \$3.50; 25 For \$7.50; 50 For \$12.50; 100 For \$22.50.

NORTHERN OAK—Slow growing, but sturdy and long lived. Our plants are from seed collected from native trees from the northwestern part of S. Dak. They are best transplanted when small. Prices: 2 yr. Plants—10c Each; 10 For 75c; 25 For \$1.50; 100 For \$5.00.

Black Hills Spruce

CHOICE BLACK HILLS SPRUCE—Beautiful thruout the year. Continuous lasting enjoyment.

Prices For Balled and Burlapped, Choice Specimen Stock.

Niobe Weeping Willow

The superb, graceful beauty of the Niobe Weeping Willow is near to the utmost in distinctive specimen ornamental planting. Its beauty is a continual joy. In winter and summer its graceful branches sway in the slightest breeze and wave their beauty to all. Professor N. E. Hansen introduced Niobe Weeping Willow from the colder parts of Europe and so it is perfectly hardy far north in Canada.

PRICES:

3-5 Ft. Trees 50c Each.

4-6 Ft. Trees 75c Each.

5-7 Ft. Trees \$1.70 Each.

Three For The Price Of Two.

CUT LEAF WEEPING BIRCH

One of the prettiest specimen ornamental trees grown. With fancy cut leaf foliage, and gracefully drooping limbs. Price: 4-3 Ft., \$1.75 Each.

CARL A. HANSEN NURSERY
Brookings, S. D.

A Low Flowering Hedge

defying the most severe weather conditions thruout the northwest. It is hardy without the slightest winter protection whatever, on the driest uplands of our western states and many hundreds of miles north into Canada.

Siberian Flowering Almond

A Glorified Shrub Of Alluring Loveliness

The Hardest Dwarf Ornamental

The Siberian Flowering Almond is a beautiful, dwarf, lawn shrub which Professor Hansen thinks is destined to great popularity. It is perhaps the hardest of dwarf ornamentals as it is native of an 8-inch rain fall country with the temperature ranging from 50° below zero in winter to 106° above in the summer. It is capable of

Earliest Shrub to Bloom in Spring

Siberian Flowering Almond is the earliest shrub to bloom in the spring. Before the other shrubs are out and its own leaves appear, it is covered with abundant bright rose-pink, fragrant flowers. It remains a beautiful mass of blooms for nearly three weeks. The flowers being fragrant and of such brilliant hue, are valuable for bouquets in the house and will last a week or more in a vase of water.

Has Bright Fall Coloring

In the fall of the year the leaves turn to a pretty gold and red color and liven up the landscape. The fruit usually hangs on after the leaves have fallen and is ornamental.

Dwarf Growing

Fine as Low Hedge

For a low, hardy, flowering hedge none can excel the Siberian Flowering Almond. Plant them 12 to 18 inches apart. The plants may be pruned severely and will form a matted flowering hedge of 12 to 18 inches in height. Or if left untrimmed will form a beautifully symmetrical, natural hedge of about three feet in height.

Good in Border or Groups

In border or group planting Siberian Almond's beauty is at first apparent by contrast. As it is the first shrub to bloom in the spring it lightens up the other shrub plantings and is in bloom till they show their flowers. Plant them freely in front of the larger shrubs for their early spring beauty. And in front of the Almonds plant tulips, crocus and perennials and you will have flowers all season.

A Splendid Ornamental of Great Worth

HARDY ROSES

To many, there is no flower in the garden lovelier than a rose, yet, contrary to the opinion of many, they are easy to grow and their culture can be successful if the proper simple care and attention is given them. We sell only the hardiest sorts in each color. All double kinds.

Prices—By Color—Red, Pink, White, or Yellow: Each 50c; 3 For \$1.25; 6 For \$2.00; 12 For \$3.50. Special Assortment—One Each Of Three Colors—Our Selection \$1.00.

CLIMBING ROSES

Red, Pink, White, or Yellow Climbing Roses, Not completely hardy, and must be taken down in the winter. Each 75c; 3 For \$2.00.

SIBERIAN BUSH HONEYSUCKLE

A splendid, tall, fine-foliaged, hedge plant which is of added value because of its pretty pink and white flowers in the early spring, followed by masses of bright red and orange fruit, that are attractive to the birds. Also a fine specimen plant for both lawn and group plantings.

Choice Assorted 12 Tubers

For \$1.00; 25 For \$1.75.

CARAGANA

THE HARDEST AND BEST OF HEDGES

By far the hardest and best plant for low wind-break, is Caragana. As it is practically immune to disease, will endure the severest droughts and cold, and does amazingly well on the poorest of soils.

It was introduced from Siberia and is highly recommended by the best authorities on horticulture as being the hardest and best all around hedge plant, and low windbreak for the northwest.

Caragana has a delightfully pretty, light green, fern leaved foliage, which grows very dense from the ground up. It has an abundance of bright yellow blooms early in spring. If untrimmed Caragana will grow to height of twenty-five feet or more or it may be kept trimmed to any desirable height.

HARDY HEDGE ROSES—The Stately Beautiful Hedge

Nothing is more beautiful in hedges than a rose hedge. And nothing can be harder than these Hardy Siberian Hedge Roses. They were introduced from Siberia by Dr. N. E. Hansen and have been developed by him for their beauty for years. The result is, we have a wonderful flowering hedge to offer which blooms all summer long from June till it freezes. The flowers are fragrant, large and beautiful beyond words.

With a hedge of these around your lawn you will have a flowering border of beauty to frame your place which will be a continual joy and everlasting pleasure thruout the years to come.

Buy them now and beautify your place beyond the hope of your fondest dreams. We have a fair supply but they will not last long for we are listing them at a very low price considering their wonderful value. So take advantage of the opportunity now and order a good supply to extensively plant them in hedges around your yard, and in shrubby groups on your lawn and close to the house.

SIBERIAN LAVATERA

A pretty flowering perennial brought by Prof. N. E. Hansen from Siberia. Flowers large, up to two and three inches across, single, and a pretty lavender-shell pink. Blooms profusely all summer. Prices: Each 50c; 3 For \$1.25; 6 For \$2.00; 12 For \$3.50.

HANSEN PROSO—The Grain Of The Age!

The Best Catch Crop For The Northwest

Hansen Proso is destined to a great future and the time is not far off when it will be one of the major grains of commerce. It is easy to grow, does well on poor soil, is a good weed killer, as it should be sown in late June for the best results.

The grain head of the plant resembles oats but the kernel is round, quite hard and about the size of wheat. The inner color of the grain is pure white and should not be confused with the colored Proso or so-called hog millets of commerce as Hansen Proso is superior in every way, size, color and production and in addition can be used as a breakfast food and ground into flour for bread and pastry. Sow about 15 to 25 lbs. to the acre. Prices: 1 lb. 25c; 10 lbs. 75c; 25 lbs. \$1.50; 100 lbs. \$3.75; 250 lbs. \$8.50.

COSSACK ALFALFA—The Greatest Of All!

Prof. N. E. Hansen's Wonder Plant

This marvel of all Alfalfas is absolutely hardy on our most exposed prairies. Does well and produces abundant forage and seed in the driest of years.

It was introduced from Russia by the Plant Wizard, Prof. N. E. Hansen, and will withstand our severest winters and give a wealth of forage and hay every summer. Prices: 1 lb. 75c; 10 lbs. \$6.50; 25 lbs. \$12.50; 100 lbs. \$45.00.

One Bundle Of Proso.
Grown in Western S. Dak.

SEMIPALATINSK

The Hardest Of All Alfalfas

This yellow flowered alfalfa was found and brought by Prof. N. E. Hansen from Semipalatinsk, Siberia, where the annual rainfall is only eight inches, and the temperature ranges from 60° below zero in winter to 110° above in summer.

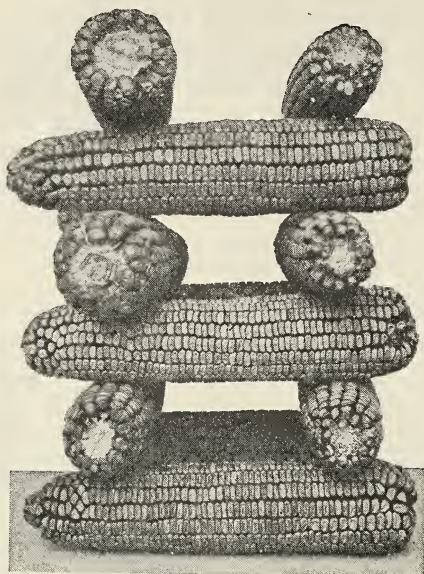

It is harder and will produce more good forage year after year, than any other alfalfa. As it is of spreading branching habit, with heavier growth than Cossack in dry weather, it is by far the better pasture alfalfa. However as Semipalatinsk sheds its seeds over a period of time, it is best planted by means of transplanting plants. For hay crop plant in regular corn rows about 3 or 4 feet apart and cultivate for a year or two and let it self-sow the balance of the field. For a pasture crop plant in scattered places over the field. This can easily be done in the pasture and hay field just after a rain, by taking a spade and prying open the ground to allow for placing the plants, here and there over the field.

For appreciable results in mixed pasture use, it is advocated that at least one hundred plants be planted to the acre. Everyone knows the great value of alfalfa, and at least a few scattered plants in your already established pasture is a great asset. Especially in dry years is this so and also every year late in summer when the other pasture is getting dry.

Prices For Strong 3 and 4 Year Plants: 10 For 75c; 25 For \$1.50; 100 For \$5.00; 250 For \$10.00; 500 For \$15.00; 1,000 For \$25.00; 5,000 For \$100.00; 10,000 For \$150.00.

Dr. N. E. Hansen and a
Single Semi Plant

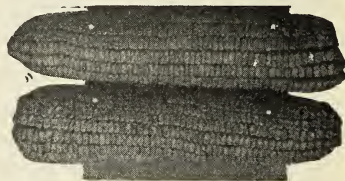

Hansen Yellow Dent

Prices: 1 lb. 25c; 10 lbs. \$1.50; 25 lbs. \$3.50; 1 bu. \$6.50.

MINNESOTA NO. 13

A good early yellow dent corn. Kernels are dark yellow, of medium depth, and the cob is red. It is almost a sure crop. It is high in protein and a mighty good feeding corn.

Prices: 1/2 Bu. \$2.50; 1 Bu. \$4.50; 10 Bu. \$40.00.

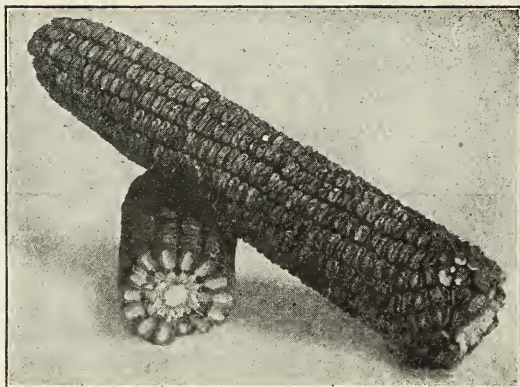

Minnesota No. 13

75-DAY YELLOW DENT CORN

Another of our own improved corns. Cross of an early yellow dent corn and an early yellow flint. The result after much selection and trial is a real yellow dent corn that will mature along with the flint corns. It is well dented, and of good yellow color. Ears well off the ground.

We have but a very limited quantity of seed to offer this year.

Prices: 1 lb. 50c; 10 lbs. \$2.50; 25 lbs. \$5.50; 1 Bu. \$10.00.

Northwestern Dent

HIGH GRADE

*Picked Early
Shelled and Graded*

HANSEN YELLOW DENT

This is a variety of corn of our own, on which we have worked and improved for years. It is somewhat similar to Minnesota 13, or Early Murdock, but will outyield either of them, and is earlier to mature.

The prime factors kept in mind in the development of this corn were first of all early maturity, for unless a corn matures properly year after year, it has little real value. And secondly to get a yellow dent corn that would outyield all other yellow dents. So this—our Hansen Yellow Dent Corn, is what we have to offer after our years of research, development, hybridization, and selection.

We highly recommend this corn for general planting be it for silo, feed, hogging off, or for market. Hansen Yellow Dent has a good yellow color, well dented, good depth of kernel, and large ears, which come at a handy height from the ground. The stalks are large, strong and succulent.

We have only a fair supply of this corn this year, so it will be well to order your requirements early.

NORTHWESTERN DENT

One of the best corns for hogging off as it is early to mature, real productive, and within easy reach of the hogs. Yet the ears are not so low to the ground as to be hard to pick.

Prices: 1/2 Bu. \$2.75; 1 Bu. \$5.00.

FODDER CORN

Especially for the silo or fodder, or for hogging off. Composed of a mixture of our best corns, but of the second best grading, so cannot be checked very well.

Prices: 10 lbs. 75c; 25 lbs. \$1.25; 1 Bu. \$2.50; 10 Bu. \$20.00.

SEED CORN

— Properly Dried
— High Germination

WHITE CAP DENT

One of the best yielding corns grown in the north-west. But due to its color, which is a mixed bright yellow and red with a white cap, is not a good corn for the market. However, it makes a large growth of stalk and the yield is always good. The ears being very large, long, and the kernels quite deep.

An excellent corn for hogging off and for home feeding, and is usually surer to yield year after year than any other dent.

Prices: $\frac{1}{2}$ Bu. \$2.25; 1 Bu. \$4.00; 10 Bu. \$35.00.

White Cap Dent

SEED GRAINS

We have a complete line of seed grains and specialize in the following. All lots well cleaned and of high germination. Sacks Free.

VELVET BARLEY—A smooth bearded barley, with absolutely no barbs on it. Per. Bu. \$2.00.

HULLESS BARLEY—A good barley which has no hulls or beards. Per Bu. \$2.60.

TREBI BARLEY—The sturdiest and highest yielding barley. Per Bu. \$1.95.

BURT OATS—An enormous yielder of high quality oats. Per Bu. \$1.50.

GOPHER OATS—Large, heavy, and a sure producer of a good quality crop. Per Bu. \$1.35.

KUBANKA WHEAT—The most rust and drouth resistant Durum Wheat. Per Bu. \$2.50.

RUBY WHEAT—Extra early, heavy yielder, and a good milling wheat. Per Bu. \$2.75.

MARQUIS WHEAT—A high quality, hard spring wheat, in great demand. Per Bu. \$2.60.

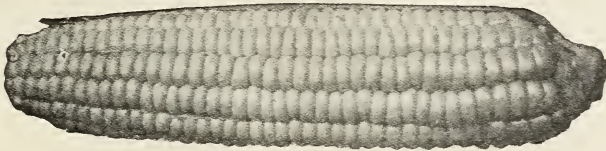

WILT RESISTANT FLAX—The only safe flax for old ground. Heavy yielder. Per Bu. \$3.75.

SPELTZ—A great feed grain. Enormous yielder. Does well everywhere. Per bu. \$1.50.

FLOWER AND VEGETABLE SEEDS

We have a complete assortment of all the standard varieties in both Flower and Vegetable Seeds. For a full list with descriptions, see our last year's catalog. Send us your order for what you want and we will fill it with the best we have.

Prices For Extra Large Packets Of Fresh High Germinating Seeds—10c per Pkt.

Golden Sunrise Sweet Corn

GOLDEN SUNRISE SWEET CORN

A new delicious golden sweet corn with the Golden Bantam flavor and two whole weeks earlier. It even beats the Sunshine, heretofore the earliest yellow sweet corn, by a number of days. It took 15 years to develop this sensational early corn. Remember its three big points,—large size, delicious flavor, and extreme earliness. You will have the first sweet corn for market and table in your neighborhood. It will make you good money and we highly recommend this variety.

Prices: Per Large Packet 15c; Per lb. 45c; 5 lbs. \$1.75, 10 lbs. \$3.00; 25 lbs. \$6.50; 50 lbs. \$11.50; 100 lbs. \$20.00.

EARLY WHITE DENT CORN

An extra heavy yielder and will do better in poor corn years than the other dents. It will outyield with good ripe corn most other corns as it has been bred for yielding and early maturity. It will stand extremes of temperature and drouth very well and does surprisingly well on poor soils.

Prices: 10 lbs. \$1.25; 25 lbs. \$2.75; 1 Bu. \$5.00.

Early White Dent

Siberian Flowering Crab

The Superb Beauty Of Ornamentals

In All Its Springtime Glory

Shade Tree — Fruit Tree

The new and improved Siberian Flowering Crab or *Pyrus Baccata*, from the cold dry regions of Siberia is a commendable tree for ornament and utility. It must be seen and used to be fully appreciated.

Gloriously Beautiful

Its glorious, gorgeous, early spring magnificence adorned in an avalanche of large pink and white flowers of superb fragrance begins its alluring loveliness. This unquestionably makes it both a fine specimen ornamental for the lawn and wonderful as a street tree. Used in a windbreak, it gives the whole place a living frame of beauty.

For The Lawn Or Boulevard

The blossoming is followed by a mass of dense, bright green foliage, covering heavily shouldered and wide spreading branches, thus making it a fine shade tree for the street or lawn. This fine, heavy foliage of the Siberian Flowering Crab, which has a tendency to be cut-leaved, forms a huge canopy of living green for many delightful summer lawn parties and picnics.

A Fine Fruit Tree—Bears Early

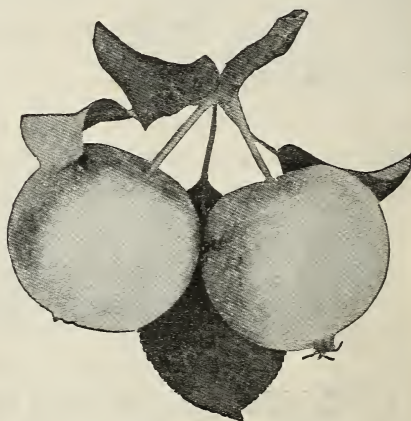

Then comes the bright red and yellow fruits which can be used for eating, jelly, or pickling, or are best pressed out and the juice added as the desired flavor in other fruit jams and jellies to bring out their full value. The juice also makes remarkable cider. The tree usually bears when about three years old.

A Beautiful Windbreak Background

Being of such a well built nature with staunchly branched limbs and with such a fine heavy network of branches, it makes a splendid tall windbreak and blizzard break when planted close together in rows and its early spring flowers will make your whole grove a glorious flower garden, then later on a good fruit orchard. Yet because of its very low price it is in line with the most common trees, and it may be used as needed protection and abundant beauty in one or two rows of your windbreak.

Sturdy—Disease Resistant

The tree itself grows to a good height and lives long. Its growth is rapid, sturdy, and vigorous. It is very drouth and disease resistant and because of its origin is absolutely hardy everywhere. Siberian Flowering Crab does well on the poorest soil, growing for years with scarcely any care or attention.

Fruit Fair Size And Good Flavor.
Makes Fine Jams, Jelly or Cider.
